

ABC IMAGING MAKING BIG STRIDES IN GRAND FORMAT PRINTING

January 11, 2008

WASHINGTON, DC - ABC Imaging, already a leader in the printing and document management industry, is making huge strides in the large format printing world. In addition to their already vast amount of services, ABC Imaging is taking on the grand format printing industry with full force and making murals, banners, billboards, vehicle wraps in large scale sizes in the highest quality available in the market.

In mid-November, a massive, sixteen foot printer was added to the already extensive fleet in ABC Imaging's headquarters in Washington, DC on 21st Street. It was not an easy task as people had to work taking down doors and bending pipes to make way for the HP Scitex XL1500. This behemoth is paving a new road for ABC Imaging and the rest of the printing industry in the grand format business. It can print crisp, clear images up to 16 feet wide and any length desired. Prints can even be matched and welded together to create wider seamless images. The prints can last up to 10 years outdoors and still maintain their first-rate quality.

In addition, ABC Imaging has also added an HP DesignJet 9000 and an HP DesignJet 10000 digital printer. Printing up to 64"W and 104"W respectively, by any length, these machines produce razor sharp prints that can be used indoors and outdoors. The eco-solvent inks will last over three years outdoors on the appropriate material while causing minimal damage to the environment. Paper,

vinyl, adhesive-back vinyl, mesh film, duratran (backlit) and fabric materials are all offered as printing surface options.

ABC Imaging also offers solutions for higher end displays. The Light-Jet 5000 is a photographic printer that uses lasers to produce true, continuous-tone photographs up to 48" x 96". Printing material includes matte and glossy photo paper, duratran (backlit) and other films. The clean detail, high-resolution and bold colors are sure to enhance any prominent indoor display with a near perfect image.

ABC Imaging is thrilled to offer these products to new and existing customers. Their sales and production staff have knowledge and experience in grand format printing that surpasses a majority of the company's competitors. They also have an unparalleled nationwide installation network to install building banners, wall murals, interior and exterior signage, vehicle wraps, and other large format printing applications throughout the country.

If you have any questions or need additional information regarding the large format products, please feel free to contact Ken Tievy, National Director of ABC's Grand Format Division, at 202-429-8870 x 341 or KTievy@ABCImaging.com.
